Mangrove Pitta ..... 169

**REFERENCES** ..... 172

Index ..... 179

 CRITICALLY ENDANGERED

 ENDANGERED

 VULNERABLE

 NEAR THREATENED

## About the book...

This book is one among the smaller state-specific companion volumes to the comprehensive *Threatened Birds of India* by the first author. Here, the authors describe 8 Critically Endangered, 5 Endangered, 11 Vulnerable and 22 Near Threatened bird species found within the state of Odisha. Updated information on the status and distribution of all the threatened species is given along with potential threats, protection measures underway and recommendations for enhancing conservation of these species. This information-rich book will be of great use to decision makers, P.A. managers, bird-watchers and conservation-minded citizens in general. Numerous high quality images of the species in their natural habitats add value to this publication.
